

GATWICK AIRPORT DETAILED MOVEMENT and NIGHT PERIOD ANALYSIS BY AIRLINE OPERATOR FEBRUARY 2024

Appended below is my regular monthly report summarising details of the daily movements at Gatwick together with details of actual night period movements by airline for the month of February 2024. These are based on official Eurocontrol sources as downloaded and recorded each day online on The Original Gatwick Spotters List.

Now well into the 'Winter Season', there was an increase in the overall movements in the month of February to an average of 608 movements per day, up from 522 in January. In comparison with the last pre-pandemic month of February 2020, this was a 93% recovery but only 85% in comparison with February 2019. Our principal detailed comparison is with February 2020, the final month before the major pandemic disruption where it seems the only material Covid impact on movements were mainland China flights; (China Airlines, the Taiwanese carrier, continued to operate as normal). In future Reports, we will however return to focus again on 2019 comparisons.

As to Night Movements, full details are provided and also still show that, taking into account the reduction in overall numbers, there is still an increase in the level of overall night movements in comparison with pre-pandemic levels and, in particular, arrivals after midnight and early morning departures between 0530 and 0630.

It is hoped that these analyses will assist in making informed representations in regard to the current regulatory consultations and committees.

Overall Summary of Movements.

Appendix 1 shows the numbers of movements each week since June 2021 and shows that in the 4 weeks to 25 February 2024, they averaged 592 per day – up from the January figure of 522 per day (an increase in the final days of February raised the overall average full monthly figure to 608 movements/day). Pre-pandemic, the average in February 2020 was about 651 movements per day whilst in February 2019, the daily count was 739, which means that Gatwick in February 2024 was running at 85% of its equivalent pre-pandemic traffic levels.

Appendix 2 shows a daily movement count for each airline. EasyJet continues to be the pre-eminent airline at Gatwick, but unlike as in the Summer 2023 season, are now somewhat below 50% of all movements. The main differences between 2020 and 2024 is the reduction in British Airways short-haul flights (following the move of many flights back to Heathrow), the loss of Virgin Atlantic and the reduction of Norwegian/Norse on their financial reorganisation. To some extent, these reductions have been balanced by the ascendancy to 4th position of WizzAir and a steady increase in Vueling numbers. In comparison with the pre-Covid period, while there have been a number of new airlines using Gatwick (both short haul and long haul), they have not made up for the loss of traffic.

There were no new operators at Gatwick in February and it is likely that any changes will only become more apparent after Easter and the start of the Summer Period.

Analysis of Night Period Flights

Appendix 3 below provides details of all movements by airline and time during the Night Period from 2300 to 0659; including the 'core' period of 2330 to 0600 where the numbers of movements are, at least in theory, subject to regulatory capping (there remains controversy as to a number of mechanisms which allow flights in excess of the cap).

In the period from 2300 to 0659; the hourly figures (half-hourly for 2300 and wef 0500) were as follows for February 2024 (January 2024 in brackets):

	Landings	Take-offs
2300-2329	179 (130)	4 (10)
2330-2359	120 (84)	1 (3)
0000-0059	114 (92)	3 (10)
0100-0159	46 (48)	0 (4)
0200-0259	6 (16)	1 (1)
0300-0359	15 (17)	0 (0)
0400-0459	22 (21)	2 (0)
0500-0529	25 (19)	0 (0)
0530-0559	47 (55)	44 (35)
0600-0629	101 (97)	228 (205)
0630-0659	105 (122)	283 (222)

Arrivals in the Night Period in February increased to 780, an average of 26.9 per night in comparison with January's 22.6 per night. While this was lower than for February 2020 (28.8 per night), this difference can be entirely accounted for by the lower overall movement numbers.

As regards departures, there were 566 in February 2024 (an average of 19.5 per night) as against an average of 15.8 per night in January. This was a higher figure than for February 2020, where it was 17.4 per night.

Comparisons with 2019/2020 (pre-Covid)

Appendices 4 and 5 set out the equivalent data for Gatwick movements pre-pandemic so one can compare both the extent to which Gatwick has recovered and also to note what has materially changed to assist in considering the possible future traffic movements. Quite clearly, there are many significant differences between what we see currently and the equivalent period in 2019/20. As mentioned above, apart from Chinese flights, Covid restrictions had not yet come into play in February 2020. We also set out on Appendix 4, the total daily movements in the equivalent period for 2019.

First, looking at total movements for equivalent weeks, we see this for February (2020/2024):

Week One: 4050/3473 Week Two: 3792/4132 Week Three: 4544/4587 Week Four: 5015/4370

The overall traffic recovery levels were thus 86%; 109%; 101% and 87% in comparison with the equivalent pre-pandemic period; however, the figures in Week Two for 2020 were materially reduced by the impact of Storm Ciara on 9 February 2020 which resulted in the cancellation of 400 movements that day. Overall, comparing February 2024 with 2020, the movements are at 93% but perhaps a fairer calculation is to compare it to 2019 in which case it is at 85%.

In terms of Night Period Movements, these are the relevant comparisons:

February:	Landings		Take-offs	
	2020	2024	2020	2024
2300-2329	214	179	32	4
2330-2359	122	120	11	1
0000-0059	78	114	6	3
0100-0159	27	46	2	0
0200-0259	28	6	1	1
0300-0359	15	15	2	0
0400-0459	17	22	2	2
0500-0529	59	25	3	0
0530-0559	34	47	21	44
0600-0629	117	101	146	228
0630-0659	124	105	279	283

This comparison shows that the number of night arrival movements were broadly similar overall if one allows for lower overall traffic movements with 780 landings (2020 – 835) though it is to be noted the increase in arrival levels between 0000 and 0200. The higher numbers for the 0200-0259 period in 2020 are almost entirely due to Norwegian long-haul, which services no longer exist with its Norse successor.

In relation to departures, February 2024 was significantly higher than the equivalent in 2020 at 19.5 per day as against 17.4 in 2020. While late night departures (2300 to 2359) were materially higher in 2020, these were predominantly by Ukraine and by WizzAir which latter at the time did not have the daytime slots for its then embryonic services. Of note is the significant increase in departures between 0530 and 0629 in comparison with 2020.

Again, this month, we repeat a view that the lower overall 2023/24 figures and trends continue to suggest that one could challenge the long-term growth predicted by Gatwick in their DCO application for the Northern runway, particularly when one also takes into account the various other issues which might have an impact on future air travel. As mentioned above and previously, the Night Flight regime is also currently under review by the DfT and a Consultation document has just been issued in the past few days. It is to be hoped that the Planning Inspectorate in the DCO application may take the opportunity of considering the Night Flight regime in their Report.

APPENDIX 3: GATWICK AIRPORT NIGHT PERIOD ANALYSIS – February 2024
Departures & Arrivals 23.00-06.59

Note: Up to 0500, the date refers to the 'night of' - eg February 1 is the night of February 1/2. Movements after 0500 are recorded on the actual date (except some 'just prior 0500' arrivals).

Date	Airline	Departure Time	Arrival Time
Feb 1	EasyJet (Dep)	0557; 0608; 0614; 0657
