

GATWICK AIRPORT DETAILED MOVEMENT and NIGHT PERIOD ANALYSIS BY AIRLINE OPERATOR

OCTOBER 2023

Appended and below is my regular monthly report summarising details of the daily movements at Gatwick together with details of actual night period movements by airline for the month of October 2023. These are based on official Eurocontrol sources as downloaded and recorded each day online on The Original Gatwick Spotters List.

October is the end of the 'summer season' and we can see the gradual reduction of flights during the month (and there will be a notable drop-off once one gets into November). Whilst year on year, the number of movements in this month are some 5% higher than in 2022 they are still only at about 96% of the pre-pandemic levels. This Report continues to detail the equivalent movements in the same month in 2019 so as to highlight changes, significant or otherwise.

As to Night Movements, full details are provided and indicate that there continues to be material increases over pre-pandemic levels and, in particular arrivals after midnight through to the small hours. It is hoped that these analyses will assist in making informed representations in regard to the current regulatory consultations and committees.

Overall Summary of Movements.

Appendix 1 shows the numbers of movements each week since June 2021 and shows this month's movements averaged 774 per day – down from September's average of 843 per day. Pre-pandemic, the average in October 2019 was about 805 movements per day, which means that Gatwick in October was running at 96% of its equivalent pre-pandemic traffic levels. Also provided are known overall weekly figures into November, which shows the significantly lower numbers of movements in the 'winter' season.

Appendix 2 shows a daily movement count for each airline. EasyJet continues to dominate the numbers, regularly operating more than one of every two flights in and out of Gatwick. As services are reducing, towards the end of the month, British Airways finally handed back their leased-in 'white tail' aircraft (Tui handed their's back at the beginning of the month) but overall the only significant changes in operators in the change-over of the 'seasons' was that Air Mauritius started a daily service at the end of the month whilst there was the departure of several other long-haul carriers – notably Delta Airlines and Bamboo Airlines. WestJet also reduced their daily service to three times a week.

Gatwick are predicting some new long-haul carriers arriving in the coming months – Ethiopian Airlines and China Southern – but pre-pandemic regulars such as Virgin Atlantic, Cathay Pacific and Rwandair do not appear to be returning. On the short-haul front, Air Algerie was promised for a 29 October start but has not appeared but the Spanish carrier, Volotea did commence services during November (although curiously to Strasbourg).

Analysis of Night Period Flights

Appendix 3 below provides details of all movements by airline and time during the Night Period from 2300 to 0659; including the 'core' period of 2330 to 0600 where the numbers of movements are, at least in theory, subject to regulatory capping.

In the period from 2300 to 0659; the hourly figures (half-hourly for 2300 and wef 0500) were as follows for October (September 2023 in brackets): *(Apologies for stating the months as July and June in the September report when they should have read September and August!)*

	Landings	Take-offs
2300-2329	378 (343)	27 (111)
2330-2359	312 (393)	17 (52)
0000-0059	396 (659)	8 (45)
0100-0159	260 (443)	4 (15)
0200-0259	150 (345)	0 (7)
0300-0359	50 (208)	1 (2)
0400-0459	33 (88)	1 (1)
0500-0529	14 (29)	22 (16)
0530-0559	15 (19)	188 (215)
0600-0629	97 (108)	441 (427)
0630-0659	133 (129)	447 (465)

With the steady reduction in overall movements, we are seeing material reduction in night-time traffic with arrivals during the Night Period aggregating 1,838 landings (as against 2,764 in September) – an average of 59.3 per night as against an average of 89.2 per night in September. As the above table illustrates, these reductions are predominately post-midnight and in the small hours. Late night departures are also materially down but there is little reduction in early morning departures, sometimes categorised as the 'EasyJet rush' (as Appendix 3 clearly illustrates).

Comparisons with 2019

Appendices 4 and 5 set out the equivalent data for Gatwick movements pre-pandemic so one can compare both the extent to which Gatwick has recovered and also to note what has materially changed to assist in considering the possible future traffic movements. Quite clearly, there are many significant differences between what we see currently and the equivalent period in 2019.

First, looking at total movements for equivalent weeks, we see this for October (2019/2023):

Week One: 5831/5469 Week Two: 5562/5348 Week Three: 5559/5382 Week Four: 5590/5464

The overall traffic recovery levels were thus 96%; 97%; 94% and 95% in comparison with the equivalent pre-pandemic period, which at an average of 96% is a slight increase in recovery as compared to September.

October:	Landings		Take-offs	
	2019	2023	2019	2023
2300-2329	329	378	59	27
2330-2359	294	312	18	17
0000-0059	321	396	13	8
0100-0159	236	260	7	0
0200-0259	90	150	3	7
0300-0359	47	50	5	1
0400-0459	32	33	0	1
0500-0529	23	14	12	22
0530-0559	27	15	101	188
0600-0629	116	97	364	441
0630-0659	153	133	481	447

This comparison shows that the number of night movements, particularly arrivals in the period after midnight and into the 'small hours', continues to be significantly higher than the levels experienced pre-pandemic and at a time when the overall numbers of flights are still some 4% lower. Overall movements during the 'core' night period in October 2023 were 1,457 as against 1,229 in 2019 – an increase of over 18%, a trend which has continued throughout 2023.

Equally of note is the continuing significant increase in departures before 0600; the vast majority of which were by EasyJet.

It is reported that the traffic levels at Heathrow are now running at above pre-pandemic figures and, with airport expansion there back in discussion (and also at other London airports) taken together with issues including the impact of climate change restrictions as well as economic and lifestyle changes, the long-term growth suggested by Gatwick in their DCO application for the Northern runway is perhaps capable of being challenged. As mentioned above and previously, the Night Flight regime is also currently under review by the DfT and we would hope that they are taking account of the current figures now that a level of normality has returned. We should hear further on this towards the end of the year.

Cllr Malcolm Fillmore

APPENDIX 3: GATWICK AIRPORT NIGHT PERIOD ANALYSIS – October 2023
Departures & Arrivals 23.00-06.59

Note: Up to 0500, the date refers to the 'night of' - eg October 1 is the night of October 1/2. Movements after 0500 are recorded on the actual date (except some 'just prior 0500' arrivals).

APPENDIX 5: GATWICK AIRPORT NIGHT PERIOD ANALYSIS – OCTOBER 2019
Departures & Arrivals 23.00-06.59

Note: Up to 0500, the date refers to the 'night of' - eg October 1 is the night of October 1/2. Movements after 0500 are recorded on the actual date (except some 'just prior 0500' arrivals).
