

GATWICK AIRPORT DETAILED MOVEMENT and NIGHT PERIOD ANALYSIS BY AIRLINE OPERATOR JANUARY 2025

Appended below is my regular monthly detailed report summarising both the daily movements at Gatwick and details of actual night period movements by airline for the month of January 2025. These are based on official Eurocontrol sources as downloaded and recorded each day online on The Original Gatwick Spotters List.

As expected, January's post-Christmas traffic levels were significantly down from December. Average daily movements were 530 as against 649 in December (and were 602 in pre-Covid January 2020). By now, one would have expected the Covid impact would have diminished but while the overall movements in the month were 5% higher than in 2024, they had dropped to 88% in comparison with January 2020's figures. It was also notable that ignoring the post-Christmas week (which was at 96.6%), the recovery levels in the final three weeks of January were down to 85.6%.

As to Night Movements, full details for the month are, as always, provided and this month the level of night movements indicated that, as expected, the daily numbers were reducing particularly towards the month end but were perhaps surprisingly materially above the equivalent numbers in 2020. And, once again we continue to highlight the significant increase in early morning departures particularly in the 0530-0629 period as well as the increased arrivals in the small hours after midnight.

From this issue, I have deleted the detailed analyses of the equivalent pre-Covid movements but these and all previous reports are available on request.

It is hoped that these analyses will assist in making informed representations in regard to the current regulatory consultations and committees.

Overall Summary of Movements.

Appendix 1 shows the numbers of movements each week since July 2021 with this month's movements being an average of 530 per day; about 5% higher than January 2024's average of 505 per day but, as stated above, significantly lower than pre-Covid levels at 85.6%, all continuing to suggest that Gatwick's recovery from the pandemic has stalled.

Appendix 2 shows a daily movement count for each airline. While EasyJet still predominates, as might be expected, it significantly reduced its number of services from the second week of January. Most other operators showed far lower cutbacks – but there was perhaps a curious reduction in Vueling flights only for the second full week of January. The Turkish airlines showed a further steady reduction in services, as did Iberia and Jet2 – presumably symptomatic of the reduction of the short-haul package holiday trade. With Southern Europe seeking to reduce tourist traffic, it remains to be seen what impact this may have during 2025, given Gatwick's predominance as a leisure airport. With Gatwick actively seeking to increase its acquisition of long-haul airlines, this seems to be proving difficult. The heralded announcement that Uganda Airlines would commence four services a week in December did not happen.

Looking to the longer-term future, the Government's decision to promote Heathrow's third runway has thrown a cat amongst the pigeons. Whilst, if it happens, it will not be for many years, but it is considered likely to then have a significant impact on Gatwick's traffic levels. While in the DCO examination for its Northern Runway, Gatwick relied on a forecast massive increase generally in air traffic over the next ten or so years and opined that this would justify both Heathrow 3 and Gatwick 2, with all the other political, climate and economic pressures impacting on air travel, one may well see these future projections being downgraded. And, if by 2035/2040, Heathrow Three does come into being, there will be an inevitable transfer of long-haul services to the 'hub' airport once additional slots become available and one has noted that even EasyJet has said it would want to move some of its operations there.

Analysis of Night Period Flights

Appendix 3 below provides details of all movements by airline and time during the Night Period from 2300 to 0659; including the 'core' period of 2330 to 0559 where the numbers of movements are, at least in theory, subject to regulatory capping (there remains controversy as to a number of mechanisms which allow flights in excess of the cap).

In the period from 2300 to 0659; the hourly figures (half-hourly for 2300 and wef 0500) were as follows for January (December 2024 in brackets):

	Arrivals	Departures
2300-2329	117 (217)	13 (15)
2330-2359	78 (127)	9 (12)
0000-0059	70 (149)	5 (14)
0100-0159	67 (104)	2 (3)
0200-0259	43 (59)	1 (1)
0300-0359	12 (23)	0 (1)
0400-0459	42 (29)	0 (2)
0500-0529	44 (49)	0 (0)
0530-0559	68 (80)	38 (53)
0600-0629	107 (77)	251 (328)
0630-0659	103 (111)	234 (331)

Movements in the Night Period in January were notably lower than those in December following the Christmas rush with arrivals aggregating 751 (as against 1,025 in December) – an average of 24.2 per night (December 33.1). It was, however, noticeable that early morning arrivals were higher month on month – due almost entirely to long-haul arrivals. Night Period departures were also well down in

comparison with the previous month and totalled 553 (December 760) an average of 17.8 per night as against the December average of 24.5 per night. The number of EasyJet departures in the 0500-0559 Core period were almost insignificant in comparison with previous months.

Comparisons with 2019/20 (pre-Covid)

While there have been, as previously related, some significant operator changes between pre-Covid and today, the overall mix is not dissimilar with still a heavy concentration on short-haul low-fare European flights; hence there is little merit in continuing to publish pre-Covid information in detail but the summarised numbers are extracted.

First, looking at total movements for equivalent four weeks, we see this for January:

	2020	2024	2025	Net Recovery 2020/2025
Week One	5060	4569	4890	96.6%
Week Two	4320	3487	3687	85.3%
Week Three	3955	3207	3345	84.6%
Week Four	3978	3372	3462	87.0%
Totals [4 weeks]	17313	14635	15384	88.8%
Totals [full month]	18667	15664	16444	88.1%

The overall traffic recovery levels from pre-Covid in the month was thus down to 88.1%, which is a significant reversal in the levels of recovery indicated in earlier months. While there have been weather issues, such events are normal at this time of year.

In regard to Night Movements, we compare the current month with the equivalent both in January 2020 and in January 2023.

January:	Arrivals			2020	Departures	
	2020	2024	2025		2024	2025
2300-2329	162	130	117	30	10	13
2330-2359	71	84	78	3	3	9
0000-0059	34	92	70	5	10	5
0100-0159	13	48	67	2	4	2
0200-0259	20	16	43	2	1	1
0300-0359	16	17	12	1	0	0
0400-0459	24	21	42	0	0	0
0500-0529	52	19	44	4	0	0
0530-0559	78	55	68	23	35	38
0600-0629	138	97	107	166	205	251
0630-0659	136	122	103	266	222	234
Totals	744	701	751	502	490	553
Core Night	308	352	424	40	53	55

This comparison shows that whilst the number of night arrivals in January 2025 were somewhat similar to the equivalent pre-Covid level, this does not recognise that the aggregate number of movements was somewhat less. More notably, the arrivals in the Core Night Period were materially higher – and which seems to be a continuing trend.

The overall level of night departures was, on the same basis, also materially up on both 2020 and 2024 figures. Significant is the increase in the 0530 to 0629 period – again a continuing trend. While EasyJet have substantially reduced their departures in the pre-0559 period, they still form the majority of the early morning departures.

We now have the much promised but delayed outcome of the review by the DfT of the Night Flight regime, which, as expected, made no changes – with the rationale that they are awaiting several detailed reports on the impacts of night noise, one of which is understood not to be expected until 2026.

Cllr Malcolm Fillmore
